

Fusion eTrack - Personnel Tracking For Your Blackberry

Fusion eTrack is a mobile APL (automatic personnel location) solution that runs on the RIM® BlackBerry® platform. Fusion eTrack allows mobile workers to effectively communicate critical information about status, dispatches and location to a central base.

Fusion eTrack improves communication to and from the mobile workers, allows real-time location reporting, status reporting and messaging that is non-intrusive to your personnel on the move.

Here is how Fusion eTrack can help you:

- **Real-Time Tracking of Key Personnel Members as well a Special Teams** (SWAT, divers, volunteer firemen, etc.) - know the location of your key personnel in real-time.
- **Real-Time Status Reporting** - confirm whether your personnel have received dispatch information and if they are enroute to the scene.
- **Routing** - "best route" recommendation provided automatically with each dispatch, allowing quick and efficient movement of your team.
- **Silent Dispatch** - dispatch sent wirelessly to BlackBerry, eliminating the need for voice dispatch and the possibility of voice miscommunications.
- **Text Messaging** - allows quick and easy communication across teams without the use of radios; eliminates voice miscommunications.
- **Easy Integration** - integration with most CAD and AVL platforms on the market; compatible with your existing software solutions.

Contact us at **800-537-3927** or sales@ortivusna.com to learn more about this economical application that connects your team and improves your results.
